Nasaq

Your whole school, in your hands

Less paper • **Fewer calls** • **Faster decisions**

A complete school management system, Arabic-first and fully bilingual

LET'S START WITH A QUESTION

How many times today did you ask… and wait?

"How much did we collect in fees this month?

"Who was absent today? Do their parents know?

"How many families have re-enrolled for next year?

With Nasaq, the answer is in front of you in seconds, without calling anyone.

REALITY TODAY

The information exists… but it is scattered

Every department works hard, each with its own tool

Attendance on paper

A sheet per class, typed in later… if at all

Fee spreadsheets

An Excel file per accountant, copies that never match

WhatsApp groups

Parent messages lost across dozens of groups

Separate accounting

Every invoice typed twice: here and there

A phone that never stops

Parents call to ask about absence and fees

The principal waits

Every question needs a report, every report takes days

THE COST

What does this cost you?

Time lost to double entry, searching and correcting

25

hours every week

of double entry and copying between tools in admin and finance

3

days every term

for each class teacher to collect marks and prepare report cards

2

working days a month

to calculate and check payroll, social security and tax

And the most expensive loss: fees paid late because nobody followed up in time.

Figures are rough estimates for a mid-sized school (about 500 students) and vary from school to school.

THE SOLUTION

Nasaq brings your whole school into one place

Every department works on the same data, and every role sees what concerns it

More time for teaching

Attendance in a minute, report cards built from marks automatically.

Fees collected on time

Invoices issue themselves, and overdue balances are clear and followed up.

Management sees everything

One dashboard, and every decision in its place.

FOR THE OWNER AND PRINCIPAL

Your whole school… on one screen

Every morning you see what matters, without asking anyone for a report

1

Key numbers, live

Students, absence, collections and overdue balances.

2

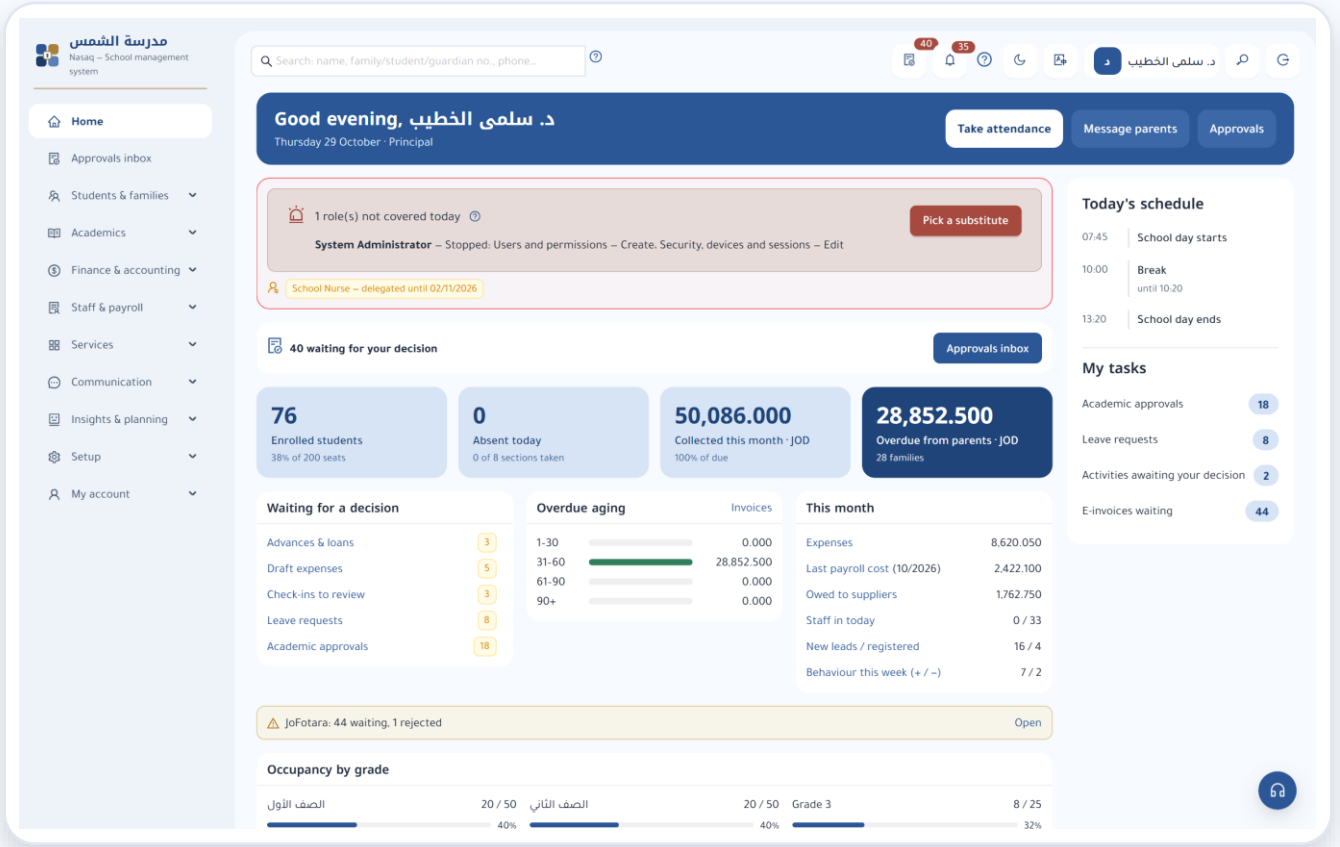

Every decision in one inbox

Leave, purchases, discounts and marks wait for your approval in one place.

3

Alerts before problems grow

A missing staff member in a key role, or a student whose results are slipping.

Fees collected on time… invoices filed automatically

From fee structure to receipt and journal entry, without entering anything twice

1

Fees generated for every student

With discounts and instalments, per student and per grade.

2

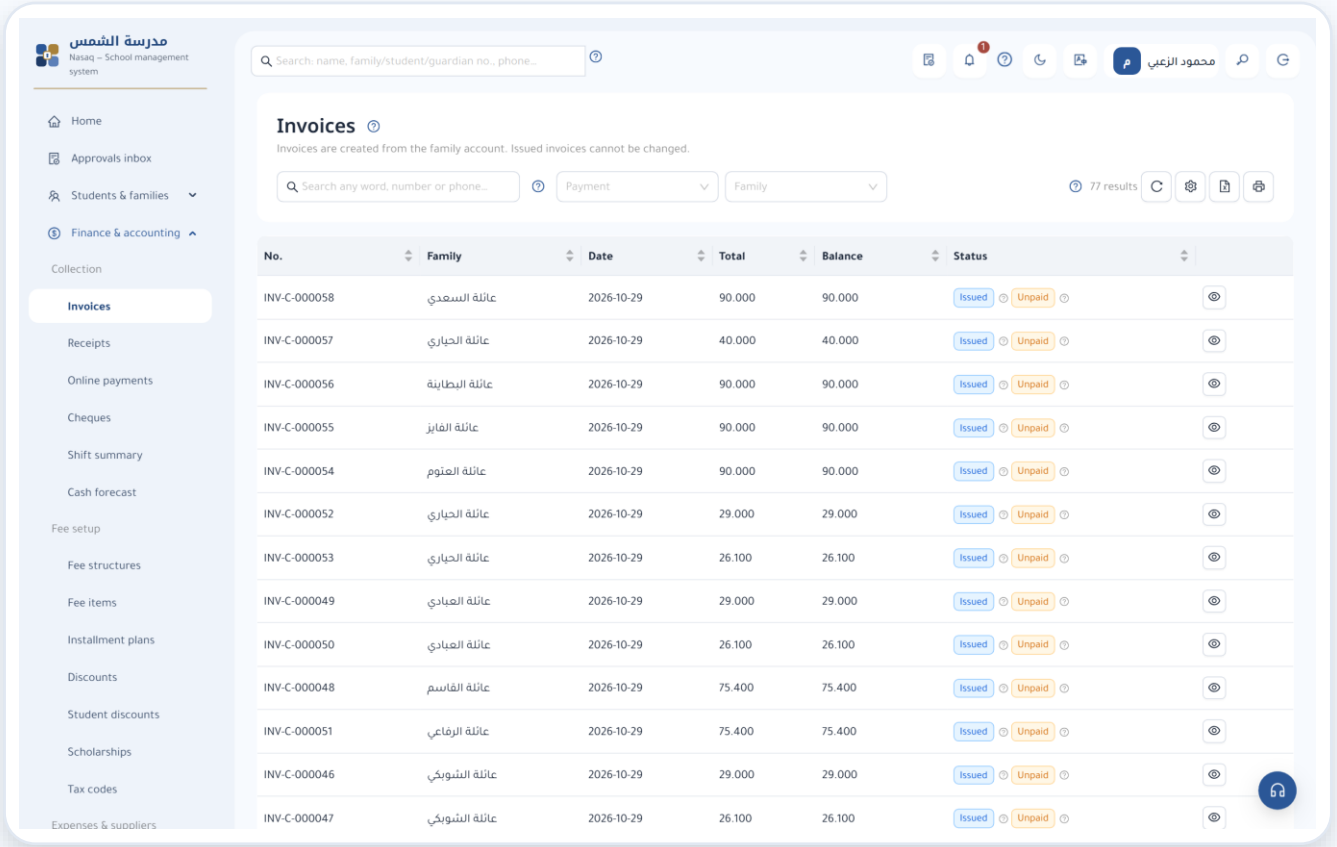

National e-invoicing built in

Every invoice goes to Jordan's national e-invoicing system with no second entry.

3

Overdue balances in plain sight

Ageing of overdue fees, and a cash-flow forecast for the coming months.

FOR THE TEACHER

Teachers' time is for teaching… not paperwork

Attendance, homework and marks from one place

1 Attendance in a minute

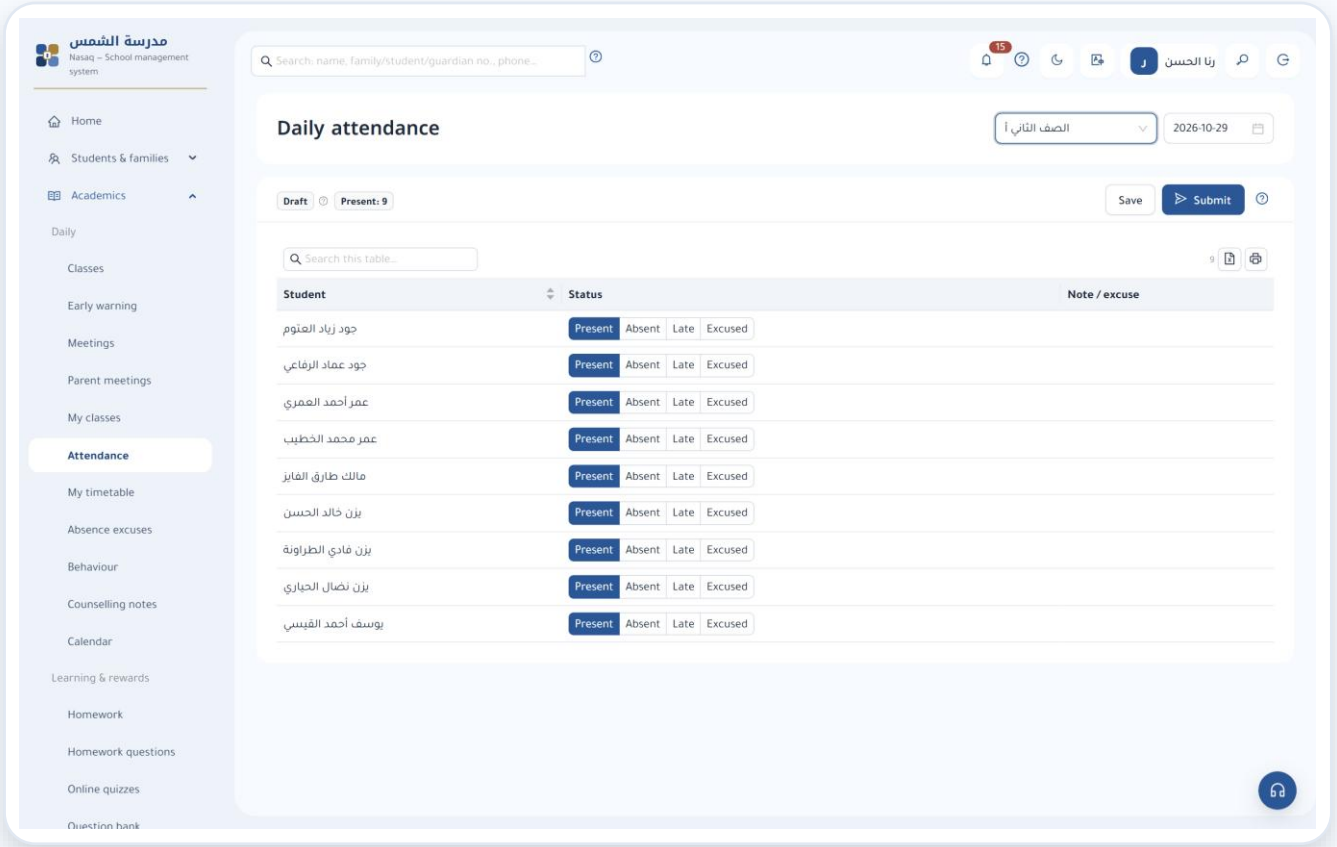

Every student starts as "present". Mark the absent ones, send, and parents know at once.

2 Homework and quizzes, made easy

Publish to the class from one place, mark it, and results reach the student.

3 Report cards build themselves

Marks add up through the term, leaving only review and approval.

FOR PARENTS

Reassured parents… and a quieter phone

The school in every parent's pocket, in one app

1 **Knows everything as it happens**

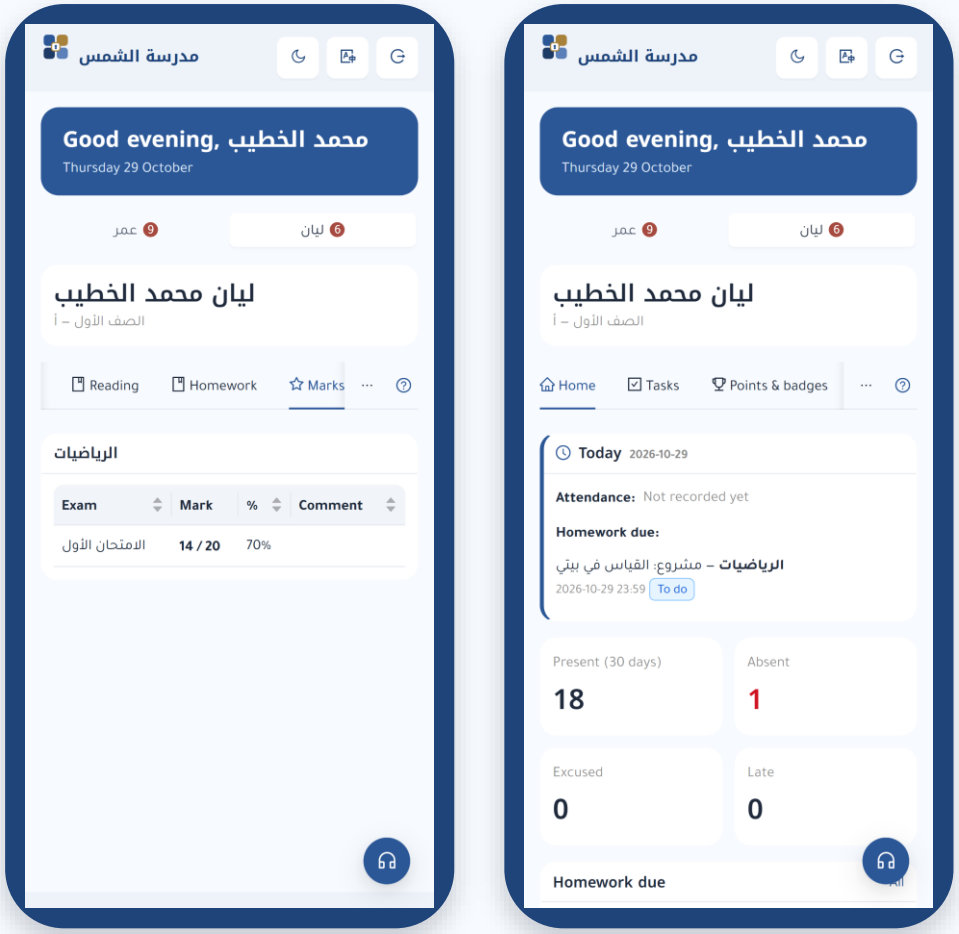

Attendance, homework and marks, day by day.

2 **Pays and signs from the phone**

Invoices and payment, and the re-enrolment contract.

3 **Gets in touch easily**

Absence excuses, requests to the school, and messages with teachers.

Accurate payroll in hours… not days

Attendance, leave and payroll, all connected

1 A complete file for every employee

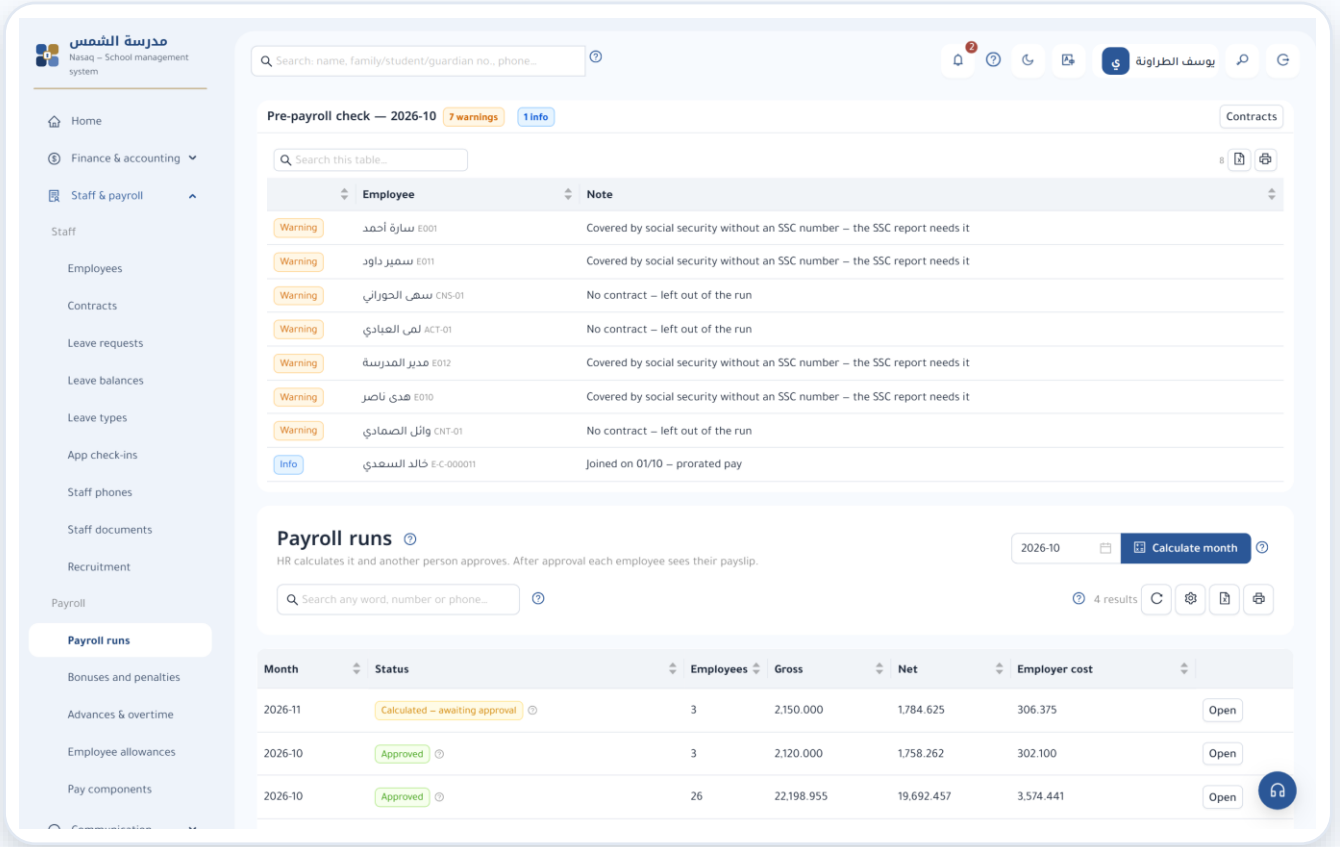

Contract, documents and leave in one place.

2 Attendance and leave feed payroll

No manual copying, no forgotten deduction.

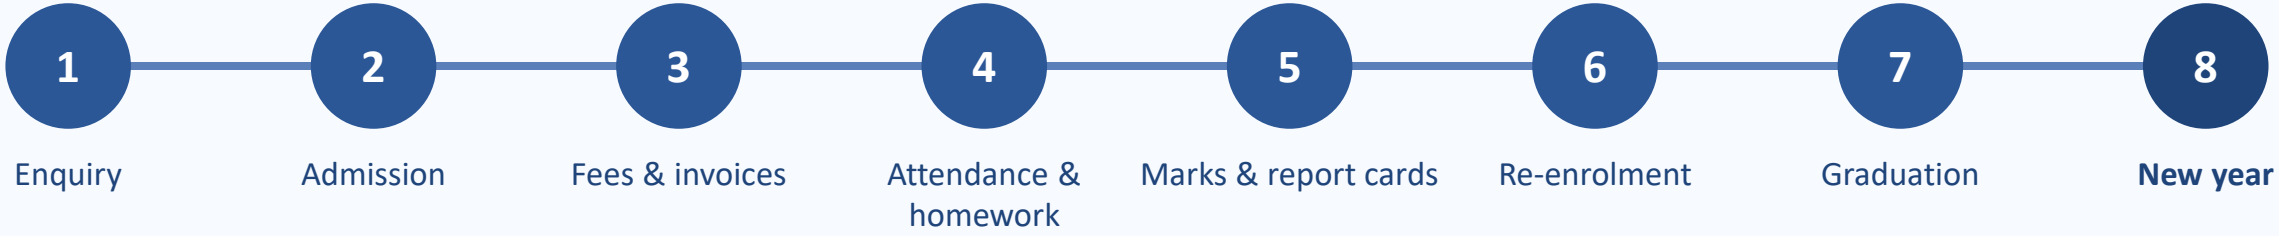

3 Social security and tax calculated

Whoever runs payroll does not approve it: finance approves, and every employee sees their payslip.

From the first enquiry… to the new year

Each step hands over to the next, with no re-entry

Re-enrolment: no student slips away

One list of every student and each family's status, and "Registered" with no paperwork because the file already exists.

The new year in one click

A preview before anything runs: registered students become active, the finished year stays complete, and nothing is deleted.

What changes at your school?

Before Nasaq and with it, role by role

Role	Before	With Nasaq
Management	Reports requested, arriving days later	The full picture every morning
Teacher	Days preparing report cards	Two hours to review and approve
Accountant	Double entry every month	Invoice, receipt and entry from one place
Human resources	Two days for payroll	A few hours
Reception	Weeks chasing re-enrolment	One list with every student's status
Parent	Calls to ask	Knows from the app

Times are rough estimates for a mid-sized school and vary from school to school.

BEFORE YOU ASK

Questions on your mind… and the answers

Will staff learn it quickly?

Each role sees only its own screens, with a guide and short videos, and we support you through training.

What about our current data?

We import students and families from your existing Excel files, checking for errors before saving.

What if the internet goes down?

An on-site server option works offline and syncs automatically when the connection returns.

Is our data safe?

Each school's data is isolated, each role sees only what concerns it, with encrypted daily backups.

Does it handle e-invoicing?

Invoices go to Jordan's national e-invoicing system from inside Nasaq, with no second entry.

What if it is not right for us?

We start with a full trial alongside your current system, and you decide after you see the results.

TRUST

Tested the way a school really works

Before it ever reaches you

744

screens checked for every role, in Arabic, English and on mobile

1,900

automated checks run with every update

Under 1 second

for the student list and search, even with 10,000 students

- **Each school's data fully isolated**
- **22 roles, each with its own screens and permissions**
- **Encrypted daily backups, with restore drills**
- **Temporary file links tied to the school**
- **An audit trail for every change and decision**
- **Compliant with Jordan's national e-invoicing**

GETTING STARTED

We start with you, step by step

Without the school stopping for a single day

1

Discovery session

We learn about your school and its needs.

2

Setup and import

We set up the system and import your data from Excel.

3

Training for every role

A guide and short videos, and we stay with you.

4

Full trial

Running alongside your current system.

On-site server or cloud… whatever suits you. Arabic first, English in one click.

Try Nasaq at your school

A full trial across every department, alongside your current system

More time for teaching

Fees collected on time

Management sees everything

Thank you
